

NEW!

Series 2 Dry Sump Pumps For Chevy LS Applications

A direct replacement for Series 1 pumps. Offers increased scavenging, while providing reliable, precise pressure control using Aviaid's proven technology!

3, 4 or 5-section External Pressure Dry Sump Pump

- 40% greater scavenging capacity than comparable-size Aviaid Series 1 pump
- Pressure section sizes available to deliver from 6 to 16 GPM flow rate
- Available with front or rear pressure section (with or without a regulator)
- Direct block mount with HTD drive –choice of many pulleys to suit the application
- Optional adapter for fuel and/or power steering pumps (also available from Aviaid)

2 or 3-section Scavenge-Only Dry Sump Pump

- Uses stock oil pump for pressure and regulation
- 40% greater scavenging capacity than comparable size Aviaid Series 1 pump
- Can be equipped with Roots-style rotors (instead of spur gears) for extra efficiency
- Direct block mount with HTD drive –choice of many pulleys to suit the application
- Optional adapter for fuel and/or power steering pumps (also available from Aviaid)

A variety of pulleys for HTD drives are available from Aviaid to suit each application.

Spur-type gears are standard in all Aviaid pumps, however scavenge sections can be equipped with Roots-type impellers for to provide additional scavenging capabilities.
