

LOW PROFILE BILLET DRY SUMP OIL PANS

CNC-machined from aerospace alloy aluminum, this new series of dry sump oil pans from Aviaid eliminates the problems common to fabricated and cast aluminum pans (cracking, porosity, welds failing, etc.).

NEW!

Current status of the billet pan program as of 12/1

- **LS-series Chevy** – Available now
- **Modular Ford** – In prototype stage
- **Honda “B, F, K”** – In development
- **Ford FE (Cobra & GT)** – In development

Engineered for optimum ground clearance (pan depth 1.700"). All Aviaid billet pans come equipped with 3-5 integral pickups and a windage screen. A natural finish is standard, while full polishing or anodized in a color of your choice, are available options.
